PROFESSIONAL SUMMARY

Second-year CS student at ESTIN specializing in Flutter mobile development. I've shipped apps across two national hackathons and maintain personal projects exploring AI integration and full-stack mobile architecture. I build apps that work, solve real problems while focusing on clean architecture and UI.

EDUCATION

B.Sc. in Computer Science — ESTIN, Béjaia, Algeria

Expected graduation: 2027 | Currently: 2nd Year

Relevant coursework: Programming, Data Structures, Mobile Development

TECHNICAL SKILLS

Languages: Dart (Advanced) • Python • C

Framework: Flutter (Intermediate)

State Management: GetX • Riverpod • Provider

Backend: Supabase & Firebase (Auth, Database, Storage)

Tools: Git • API Integration • OCR • Voice APIs • Docker

OS: Arch Linux

Other: UI/UX Design • Cybersecurity fundamentals

PROJECTS

PocketAI – AI Expense Tracker [\[Finovia 2025 Hackathon\]](#)

Stack: Flutter, Dart, Dio, fl_chart, OCR, Voice APIs

- Built smart finance app with AI chatbot, receipt scanning via OCR, and hands-free voice commands.
- Implemented interactive spending charts and dashboard for real-time financial visualization.
- Delivered full authentication flow, camera integration, and audio recording within hackathon timeframe.

Hewesbiya – Cultural Guide App [\[Djezzy InnovTech Hackathon\]](#)

Stack: Flutter, Dart, Provider, Dio, Geolocator, Flutter Animate

- Developed location-aware cultural tourism app for Algeria with GPS-based landmark recommendations.
- Integrated smart audio guides and smooth UI animations for immersive user experience.
- Structured app with clean feature-based architecture (core/features separation).

E-Commerce Platform – Mobile App + Admin Panel [\[In Development\]](#)

Stack: Flutter, Dart, Supabase (Auth, DB, Storage)

- Building full-stack e-commerce solution with a customer-facing Flutter app and a separate admin panel.
- Implemented Supabase backend with authentication, product listings, and real-time database.
- Cart and orders module currently in progress; UI refinement ongoing.

SkillZone – E-Learning Platform

Stack: Flutter, Dart, GetX

- Built modern e-learning app with GetX state management and responsive course browsing UI.
- Achieved 5 GitHub stars — top-performing personal project in portfolio.

Prayer Times App

Stack: Flutter, Dart, Aladhan API

- Integrated Aladhan API for real-time, location-based prayer schedule fetching.
- Implemented offline support and clean, minimal user interface.

PROFESSIONAL EXPERIENCE

Network & Security Systems Technician

YOTTA — Algeria : June 2024 – April 2026 part-time

- Installed and configured CCTV systems (IP & analog), including cameras, NVRs, and monitoring setups
- Deployed structured cabling systems (Ethernet, coaxial, and fiber optics) across residential and commercial buildings
- Performed fiber optic fusion splicing and signal testing to ensure stable connectivity
- Installed and organized network racks (armoires), switches, and patch panels
- Routed and secured cabling through walls, ceilings, and infrastructure using professional tools
- Diagnosed and resolved network and security system issues on-site

SOFT SKILLS

- Teamwork & collaboration — contributed to multiple team hackathon projects under tight deadlines
- Problem-solving under pressure — shipped functional apps within 48 hour hackathon windows
- Self-learning & initiative — independently mastered Flutter, multiple state management libs, and backend integration outside of coursework
- Communication — active contributor in cross-functional university project teams
- Proactive mindset — joined a university group project voluntarily to contribute mobile expertise

LANGUAGES

Arabic: Native

English: Fluent

French: Intermediate
